The use of the three former Tables of Use upon Use, according to the rate of 6 in the Hundred.

FOr the first, if you would know to how much one pound stock amounts (at Interest upon Interest) in any number of years not exceeding 31, seek the number of years in the first Column towards your left hand, under this word Years, and there directly against the same you shall see the Sum desired.

Example.

Admit it be required to know how much 1 l. stock amounts to at Interest upon Interest in 21 years, look 21 under the word Years, and directly against the same you shall see 3 l. 7 s. 11 d. 2 q. which is the Sum desired.

But suppose the Question were to finde the increase of 10 l. stock in the same time, multiply the same by 10, or adde the same 10 times together, which makes 33 l. 19 s. 7 d. which is also the Sum desired. And thus may you work upon any Sum desired in any of the other Columns observing the manner as is before, as the Propositions nominated in the head of each Column do direct. And thus much for compound Interest.

Now for simple Interest direct, I have composed the following Tables at the rate of 6 per Cent. whose Use is thus. Seek the Summe desired, and under the same you shall have the Interest due for one year, or any time under, namely from one month to twelve, as is there expressed, which of it self is so plain that it needs no farther explanation.
